Training of trainers manual on the operation, maintenance and repair of farm machinery

Abstract:

This Training of Trainers (ToT) manual aims to provide insights into the operation, maintenance and basic repair of farm machinery. It provides an overview of the main concepts of equipment that can facilitate sustainable agriculture practices, with examples and guidelines on the topic. Its objective is to provide extension officers, technicians, mechanics, and youth with the necessary information and skills to become trainers and deliver technical capacity sessions on this topic. There is a mix of theory and practice in this training. Participants must have the time to individually perform the different tasks described in the modules with close supervision.
